ONYX™ LIQUID EMBOLIC SYSTEM

Onyx™ HD-500 Liquid Embolic System

Onyx™ HD-500 is a liquid embolic agent designed for use in complex, wide-necked aneurysms allowing for complete aneurysm filling and inflow zone obliteration.

PRODUCT CATALOGUE NO.	ONYX™ FORMULATION
105-8300-500	Onyx™ HD-500

INDICATIONS: Indicated for use in the embolization of intracranial aneurysms.

Onyx™ Liquid Embolic System

Onyx™ liquid embolic system is an EVOH co-polymer designed to provide full penetration and complete packing for the embolization of vascular lesions.

PRODUCT CATALOGUE NO.	ONYX™ FORMULATION
105-7000-060	Onyx™ 18
105-7000-065	Onyx™ 20
105-7000-080	Onyx™ 34

INDICATIONS: Embolization of lesions in the peripheral and neurovasculature, including arteriovenous malformations and hypervasculular tumors.

Onyx™ Liquid Embolic System Mixer

The Onyx™ liquid embolic system mixer (shaker) is packaged one unit per box. It contains four spaces for preparation of Onyx™ liquid embolic system vials simultaneously.

PRODUCT CATALOGUE NO.	VOLTAGE
103-1205-002	240

Onyx™ liquid embolic system mixer is an accessory to the Onyx™ liquid embolic system that allows proper suspension of the Onyx™ liquid embolic system tantalum for better visualisation prior to use.

Onyx™ Liquid Embolic System Heater

The Onyx™ liquid embolic system heater is packaged one unit per box. It contains four wells to heat four Onyx™ liquid embolic system vials simultaneously.

PRODUCT CATALOGUE NO.	VOLTAGE
103-1206-002	230

Onyx™ liquid embolic system heater is an accessory to the Onyx™ liquid embolic system that facilitates proper suspension of the Onyx™ liquid embolic system tantalum for better visualisation.

Onyx™ Liquid Embolic System Syringe Catheter Interface Adapter

The micro therapeutics' Onyx™ liquid embolic system syringe - catheter interface adapter is intended for use as an accessory to the Onyx™ liquid embolic system and the 1.5F UltraFlow™ HPC micro catheter during Onyx™ liquid embolic system injection for the embolization of brain arteriovenous malformations.

PRODUCT CATALOGUE NO.
103-1207

INDICATIONS: The proximal end of the adapter incorporates a standard ISO, female luer design to facilitate connection to the syringe. The distal end is designed specifically to fit the hub of the 1.5F UltraFlow™ HPC/Marathon™ micro catheter 1.5F.

Echelon™ Syringe Adapter (ESA)

The Echelon™ syringe adapter was created to address an immediate need of physicians for an additional fully compatible micro catheter option for use with the Onyx™ liquid embolic system. The ESA establishes complete compatibility between Onyx™ liquid embolic system and Echelon™ micro catheter by:

- 1) Reducing dead space in the catheter hub, which prevents Onyx™ liquid embolic system and DMSO mixing in the hub.
- 2) Simplifying the preparation process. By increasing the compatibility in these ways, the ESA significantly improves the visualization of Onyx™ liquid embolic system under fluoroscopy.

BALLOONS

A single lumen design balloon catheter with a complete line of sizes of compliant and super compliant neurovascular balloons for the optimal support of neurovascular procedures. Hyper balloons are DMSO compatible.

HyperForm™ Occlusion Balloon System Line Extension

The HyperForm™ occlusion balloon system is a single lumen balloon catheter that requires the insertion of the Covidien 0.010" guidewire to occlude the central lumen to allow inflation of the balloon. When the distal 10 cm platinum coil tip of the guidewire is advanced to or past the catheter tip, it occludes the inflation holes allowing the balloon to inflate through catheter sideholes.

The Echelon™ syringe adapter was created to address an immediate need of physicians for an additional fully compatible micro catheter option for use with the Onyx™ liquid embolic system. The ESA establishes complete compatibility between Onyx™ liquid embolic system and Echelon™ micro catheter by:

- 1) Reducing dead space in the catheter hub, which prevents Onyx™ liquid embolic system and DMSO mixing in the hub.
- 2) Simplifying the preparation process. By increasing the compatibility in these ways, the ESA significantly improves the visualization of Onyx™ liquid embolic system under fluoroscopy.
